

# PWD Control

|                |  |
|----------------|--|
| PWD Control Id | 24   |
| Crop ID        | Niger Seed   |
| Pwd Name       | Powdery mildew   |
| Pwd Type       | Disease  |
| Causal Agent   | Sphaerotheca spp.  |
| Symptoms       | The diseased leaves turn yellow and drop off. The seed formed on diseased plants are small and shriveled.  |
| Control        | The disease can be managed by burning the infected plant parts after the harvesting of the crop. The disease can also be effectively controlled by spraying with sulfex. |
