

# PWD Control

PWD Control Id	65
Crop ID	Taro (Cocoyam)
Pwd Name	Taro blight
Pwd Type	Disease
Causal Agent	Phytophthora colocasiae
Symptoms	It causes purple to brown circular water-soaked lesions.
Control	This disease is partially controlled by use of copper- or phosphor-based fungicides, but spraying is tedious and costly. Increasing plant spacing or intercropping reduces losses.
Notes	<i>NULL</i>
