

Uses

ID	1,074
Crop ID	Swamp Milkweed
Part	Root
Use Category	Medicinal
Notes	A tea made from the roots is anthelmintic, carminative, diuretic, emetic, strongly laxative and stomachic. The tea is said to remove tapeworms from the body in one hour. It has also been used in the treatment of asthma, rheumatism, syphilis, worms and as a heart tonic. An infusion of the roots is used as a strengthening bath for children and adults
