

Uses

ID	127
Crop ID	Chinese Radish
Part	Whole (without root)
Use Category	Food
Notes	Radish is grown mainly for its thickened fleshy root. The western radish (cv. group Small Radish) is pungent and is prized as a relish or appetizer and for adding colour to dishes. The oriental radish (cv. group Chinese Radish), being crisp with mild flavour, plays a much wider role in South-East Asia.
