

# Uses

ID	388
Crop ID	Kidney Leaf Morning Glory
Part	Leaf
Use Category	Medicinal
Notes	The leaves and young shoots are alterative, deobstruent, diuretic, laxative and purgative. They are used in the treatment of rheumatism, neuralgia and headache. An infusion of the leaves, added to lumps of sugar, is used as a remedy for cough. A decoction of the leaves and tops is sometimes used as a diuretic.
