

Potential Yield

Id	198
Crop ID	Garlic
Location	India
Part	Bulb
Potential Yield Mean (kg/ha/season)	5,100.00
Potential Yield Max (kg/ha/season)	5,900.00
Potential Yield Min (kg/ha/season)	4,300.00
Data Flag	Roundup value
Notes	The minimum value of 4310 kg/ha is rounded to 4300 kg/ha. The maximum value of 5890 kg/ha is rounded to 5900 kg/ha. The article mentioned that the yield is 4.31 under kinetin 10 ppm to 5.89 t/ha under thiourea 100 ppm. The yield is based on different treatment of plant growth regulators during the rabi season of two consecutive years 2010-2011 and 2011-2012. The experiment was conducted at Horticultural Research Station Mondouri Bidhan Chandra Krishi Viswavidyalaya Nadia West Bengal India.
