

# Potential Yield

Id	303
Crop ID	Sericea Lespedeza
Location	Global
Part	Forage (fresh)
Potential Yield Mean (kg/ha/season)	6,200.00
Potential Yield Max (kg/ha/season)	9,000.00
Potential Yield Min (kg/ha/season)	3,300.00
Data Flag	Roundup value
Notes	It's stated that hay is cut twice a season with yields of 3.3-7.6 t/ha. Forage yields may be 9 t/ha from cuttings taken at 9 weeks intervals. The mean value rounded from 6150 kg/ha to 6200 kg/ha.
