

# Potential Yield

Id	429
Crop ID	Yellow Sweet Clover
Location	Canada
Part	Whole (without root)
Potential Yield Mean (kg/ha/season)	2,300.00
Potential Yield Max (kg/ha/season)	3,200.00
Potential Yield Min (kg/ha/season)	1,300.00
Data Flag	Roundup value
Notes	The yield is based on above-ground biomass yields for yellow sweet clover during a three-year study in Saskatchewan. The minimum value of 1320 kg/ha is rounded to 1300 kg/ha and maximum value of 3238 kg/ha is rounded to 3200 kg/ha. The mean value of 2250 kg/ha is rounded to 2300 kg/ha.
