

Antinutrient & Toxicity

Antinutrient and Toxicity ID	150
Crop ID	Finger Millet
Part	Grain
Reported Factor	Protease Inhibitors
Effect	The protein inhibitors disrupt the protein digestion by rendering unavailability of the digestive enzymes, trypsin and chymotrypsin. Their presence is characterized by compensating hypertrophy of the pancreas.
Cause Toxicity	false
Cause Allergic Reaction	false
Reduction Method	<i>NULL</i>
Notes	<i>NULL</i>
Metadata Id	8,592
