

Antinutrient & Toxicity

Antinutrient and Toxicity ID	198
Crop ID	Passionfruit
Part	Fruit
Reported Factor	Tannin
Effect	Tannins interfere with digestion by displaying anti-trypsin and anti-amylase activity form complexes with vitamin B12 and interfere with the bioavailability of protein through complexing reaction with proteins.
Cause Toxicity	false
Cause Allergic Reaction	false
Reduction Method	<i>NULL</i>
Notes	<i>NULL</i>
Metadata Id	8,863
