

Antinutrient & Toxicity

Antinutrient and Toxicity ID	203
Crop ID	Argan
Part	Seed
Reported Factor	Saponins
Effect	Have antinutritional effects but it doesn't harm ruminants and pass out with the urine.
Cause Toxicity	false
Cause Allergic Reaction	false
Reduction Method	<i>NULL</i>
Notes	Cattle readily consume argan oil cake in spite of the presence of saponins that may have antinutritional effects. Noted that the greyish-green oil cake contains high amounts of saponins, which do not harm ruminants and pass out with the urine.
