

Antinutrient & Toxicity

Antinutrient and Toxicity ID	208
Crop ID	Cole's Wattle
Part	Seed
Reported Factor	Tanin
Effect	Tannins can also reduce protein availability by binding with amino acids and rendering them indigestible as well as inhibited digestion and binding of some micronutrients, in particular non-haem iron.
Cause Toxicity	false
Cause Allergic Reaction	false
Reduction Method	Tannin levels in acacia seed can be reduced significantly through soaking and cooking.
Notes	<i>NULL</i>
Metadata Id	8,919
