

Antinutrient & Toxicity

Antinutrient and Toxicity ID	9
Crop ID	Gembok Bean (<i>Tylosema esculentum</i>)
Part	Seed
Reported Factor	Saponin
Effect	<i>NULL</i>
Cause Toxicity	false
Cause Allergic Reaction	false
Reduction Method	Since saponins degrade with heat, it would be expected that roasting marama beans for a longer time duration at high temperature would degrade the saponins in the beans.
Notes	<i>NULL</i>
Metadata Id	8,522
